هل ال Value Types دائماً يتتخزن في ال Stack وال Reference Types دائماً في ال Heap؟
الخدعة دي بتوقع عدد كبير جداً من الديفلوبرز في الانترنتيوهات، والسبب إنا بنحفظ القاعدة
النصية وبننسى ال Context!
خلوتنا نوضحها ببساطة معمارية:
1. ال Stack وال Heap بيعملوا إيه أصلاً؟ ...

Question 2

Compiled:

- the whole source code translate to machine code at once before execution

Interpreted Language:

- source code translate and execute line by line

- source code compiled to IL language then the JIT compiler convert IL to Machine code

Question 3

Implicit: Conversion from smaller to larger data type there is no risk of data loss

Explicit: Conversion from larger to smaller data type , data loss may occur

Convert: Converts between compatible types and provides several conversion methods

Parse: Converts a string to a specific type
